**NUTRIENTS FOR LIFE FOUNDATION CANADA AND INSIDE EDUCATION PARTNER FOR  
EDUCATIONAL EXCELLENCE**

**OTTAWA, ON-** Nutrients for Life Foundation Canada has partnered with Inside Education to establish a regional hub in Alberta to strengthen the foundation’s learning garden program.

Inside Education will develop seven learning gardens in Alberta annually, allowing more students to discover soil science and sustainable agriculture. Learning gardens are outdoor, educational environments encouraging students to explore the science behind food production.

“Inside Education is an ideal partner for the learning garden program,” said Bob Adamson, Chairperson of Nutrients for Life Foundation Canada. “Their extensive network in Alberta will help Nutrients for Life inform Albertans about the critical role plant nutrients play in sustainable agricultural practices, while enabling students to think critically about our environment.”

Through learning gardens, students explore how modern agriculture, gardening, and plant nutrients play a valuable role in food production, health, and sustainability. Learning gardens build environmental awareness while strengthening collaboration, teamwork, and leadership in the community.

“We are delighted to partner with Nutrients for Life to assist in the empowerment of young stewards by bringing environmental education to classrooms,” said Steve McIsaac, Executive Director of Inside Education. “We believe in experiential learning and our partnership with Nutrients for Life allows for fostering a new generation of stewards of our environment and natural resources.”

Nutrients for Life aims to educate Canadians about the sustainable use of nutrients to increase the health and quality of our soil, improve production of nutritious food, and preserve green spaces.

***Nutrients for Life Foundation Canada*** is a registered Canadian charitable organization committed to bringing educational materials to the classroom, focusing on soil science and agricultural sustainability. Together, educators, community groups, scientists, and representatives from the agricultural sector produce and distribute educational materials to meet Canada's school curriculum needs with science-based content of the highest quality. Nutrients for Life Foundation Canada supports the sustainable use of nutrients to increase the health and quality of our soil, improve production of nutritious food, and preserve green spaces.
